Charlton Doors has been trading since 1988 and over the years we have built up a large customer base. We manufacture & install all types of industrial doors & security products.

We pride ourselves on meeting our customers requirements for each job.

## Roller Shutter Doors

Roller shutter doors are available with a wide variety of curtain options to provide effective security, visibility and access to industrial, commercial and retail premises. They are manufactured to industry standards and designed to provide many years of use with minimal maintenance. They can be manufactured to clients specifications for new build projects or retrofit modifications for existing openings. Our technical department are available throughout your project to advise on the most suitable, cost effective and practical solution to your industrial and commercial security requirements.

Roller shutter doors comprise an interlocking curtain from extruded or rolled laths which are guided in rigid tracks attached to the sides of the opening. The curtain is rolled onto a top roller located behind the lintel when the shutter is in the open position and progressively unwound as the curtain is lowered. Operation of the shutter can be manually or electronically controlled.

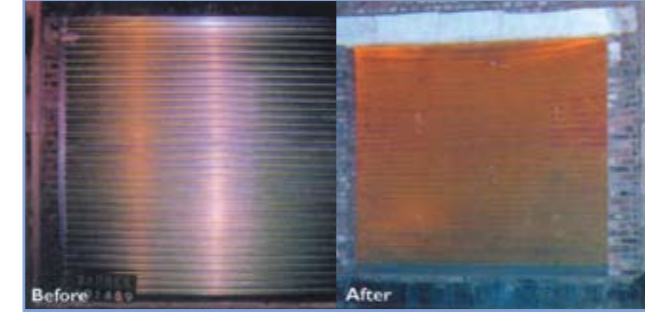

## Steel Hinged Doors

Steel Door sets combine strength with elegance, and durability with cost effectiveness. They continue to prove themselves in a wide variety of projects including: public buildings, utilities, retail parks, hospitals, schools, banks, laboratories and factories. In fact any location where safety, security and longevity is required, which cannot be met by traditional timber door sets.

Designed for an increasingly wide variety of applications they will not shrink, warp or twist, are immune to insect or vermin attack and will not support bacteria, mould or fungi. Door sets can be supplied in a primed finish for site painting or pre finished in polyester powder coat to any colour prior to delivery. Any type and make of door furniture can be fitted to the door, which is factory fitted prior to delivery to site.

## 4-Hour Fire Doors

Fire shutters are designed and tested to be an effective fire resistance barrier. Fire shutters will automatically close in the event of a fire, reducing the risk of a fire spreading from one area to another. Certified up to 4 HOUR fire rating. Fire shutters are manufactured in a similar way to conventional shutters, and can be fitted for manual closing or electrically operated for controlled descent and linked into the fire system.

## Fast Action Door

Fast-moving, functional and reliable doors are what is needed in industrial and commercial contexts. Traffic high-speed fold up doors, are versatile and solid, ensuring long-lasting reliability.

The modular structure of the curtains, assembled and joined by anodized aluminium extrusions, provides for a wide range of polyester sections, available in a variety of colours.

Deep, full-width panels ensure a safer traffic flow and allow more light in. They are fast and easy to replace, in the case of accidental damage thus saving money and time.

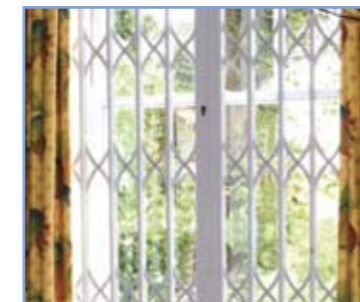

The tubular structures inserted ensure a High Wind Resistance.

Motorization, control and safety systems, and modular counterweight balancing systems are housed in the crosspiece and in the vertical uprights of the exclusive, integrated structure, engineered to withstand atmospheric agents.

Fast Action Doors are the ideal solution for external entrances and effectively operate in any situation, even when strong winds are blowing, in rooms with high depression conditions or in areas with high volume traffic.

## Security Grilles

The CX-2 is the most comprehensive grille on the market, a high security expanding gate made from stylish lattice work which provides a strong visual deterrent and protective barrier. It offers optimum visibility and ventilation, and when not in use it retracts to a fraction of the overall width. It is therefore an ideal solution for shops with products on show and patio doors, as well as other retail and domestic applications.

The CX-2 is not only attack tested and insurance approved with police preferred recognition through the 'Secured by Design' initiative,

## PVC Strip Curtains

The latest and most flexible yet in modern strip doors. Dramatically reduces heating and refrigeration costs by minimizing air flow.

Fire resistant, Impervious to draughts, dust and insects. Made of tough long-life vinyl, suspended from rugged durable simple swing hinges.

Total accessible for men and machines. Transparent strips reduce accidents, cut down glare from outside or inside.

Specially tinted strips available for example, Protection from arc-welding dazzle, or from very strong sunlight. Safety is improved by the reduction in ultra violet and infra red emissions.

## Crash Doors

Crash Doors are widely used within many industries including supermarkets, food preparation, Hospitals, Coldstores and cleanrooms. These types of doors are favoured in these environments due to their durability, ease of use, minimal maintenance and the concealed spring unit mechanism. A range of finishes to the door framework is available to suit different environments. These include powder coating, electro-zinc plating and standard paint finishes. Doors with stainless steel framework are also available.

## Dock Levellers / Dock shelters

We at Charlton doors can supply a solution for all your loading bay needs. We supply all types of Dock Levellers, Dock Shelters, Trailer Wheel Guides, Rubber Bumpers, Corner Cushions, Draught Curtains, Traffic Lights, and Safety Systems for all types of loading bay problems.

## Palisade fences and gates

Palisade has been successfully used in the following applications as a cost effective means of security.

Industrial and Commercial Premises; Power stations; Electricity Sub-Stations; Gas installations; LPG installations; Research Laboratories; Fuel Terminals; Computer Centres; Sewerage and Water treatment plants; Railways and Motorways; Police Stations and Magistrates courts

Finish: Galvanised to BS 729 to provide a system offering long life and minimum maintenance.

Polyester powder coating is offered in a choice of over 100 colours as an additional option.

We also fabricate Gates

Single leaf up to 7.0m wide  
Double leaf up to 14m wide
